

ANONOS

Schrems II Compliant Supplementary Measures

11 November 2020

Summary

The attached documents serve as evidence of the feasibility and practicability of the proposed measures enumerated in the EDPB's *Recommendations 01/2020 on Measures That Supplement Transfer Tools to Ensure Compliance With the EU Level of Protection of Personal Data*; the first document, prepared by Anonos, describes several use cases, and the others include independent audits, reviews and certifications of Anonos state-of-the-art technology that leverages European Union Agency for Cybersecurity (ENISA) recommendations for GDPR compliant Pseudonymisation to enable EDPB proposed measures.

Table of Contents

1. Maximizing Data Liquidity - Reconciling Data Utility & Protection	3
2. IDC Report - Embedding Privacy and Trust Into Data Analytics Through Pseudonymisation	20
3. Data Scientist Expert Opinion on Variant Twins and Machine Learning	29
4. Data Scientist Expert Opinion on BigPrivacy	38
